

4th ITI Education Week - Clinical knowledge at your hands

12 -16 March 2007 at the University of Freiburg/Germany

The course will present the scientific basis and the latest developments of the Straumann® Dental Implant System and the treatment concepts related to the rehabilitation of fully and partially edentulous patients

Besides a series of lectures, the participants can watch live surgeries in multiple sessions. They participate in treatment planning and surgical and prosthetic hand's-on sessions. A team of surgeons of the Maxillo-facial Clinic of the University of Freiburg will show complex case planning and extensive live surgical procedures as well as contemporary prosthetic solutions.

This one-week course has been designed for clinicians experienced in the field of implant dentistry. It will be held in English.
