

UK & Ireland ITI Congress

The Queen Elizabeth II Conference Centre in London provided the vibrant and professional surroundings for this year's very successful UK & Ireland ITI Congress "Current Evidence & Future Trends in Implantology" which took place from 2–3 November 2006.

During the two day congress, hosted by Professor Nikolaos Donos, a range of case studies and the latest research and development within implant dentistry and tissue regeneration was presented by sixteen world class speakers including Professor Daniel Buser and Professor N. Lang.

Over 400 practitioners attended this event which opened with a "Masterclass" presented by Dr Dean Morton and Dr James Ruskin who provided a superb prelude to the main ITI Congress, presenting delegates with the lively and informative presentation "Aesthetic Implant Dentistry for Advanced and Complex Patients", including case studies.

The ITI is a unique scientific network of academic and dedicated professionals in implant dentistry worldwide. It has grown considerably in recent years and in order to accommodate the needs of the organisation, the ITI has created two categories; Members and Fellows.

For more information about future ITI events contact Straumann on 01293 651230 or visit this website. To join the International Team for Implantology visit www.iti.org.
